

Data sheet

Rauch RP 200S OBA

Contract proof paper, satin, FOGRA certified.

Product description:

High-end proof paper for high-quality, colour-consistent digital proofs in accordance with standard process, FOGRA 51 certified for offset, gravure and silk printing. Also suitable for special inks.

Specific feature:

RP 200S OBA is tuned to achieve the largest possible precision for simulation of commercial print paper and produces the finest shadings and details at the pre-press stage. The excellent colour consistency of RP 200S OBA enables an exact colour matching and provides the ideal conditions for an efficient colour management. It dries extremely quickly thanks to the modern PE paper coating and can be used on all commonly deployed inkjet printers. Thus it fulfils the highest requirements for pre-press and manufacturing. RP 200S OBA has been tested in respect of FOGRA 51 proof paper guidelines and fulfils all the criteria for contract proofs in the areas of offset, gravure and silk printing. FOGRA certification guarantees tested quality.

Processing:

In order to achieve optimum print results, RP 200S must first be calibrated on the deployed printers and the corresponding inks. Colour changes can occur without calibration. For quality reasons, it must be handled and stored in atmospheres with approx. 45 - 55% relative humidity and at a temperature of 23°C. It should be stored in the original packaging in a cool, dry, clean and dust-free environment. We recommend that it is held for 24 hours before use, in the location where it is going to be used, to allow it to adapt to the climate. Avoid touching the inkjet layer. Wear cotton gloves.

Technical specification:

Material:	PAPIER
Application Area:	NUR IM INNENBEREICH
Surface:	SEIDENMATT
Specific gravity:	200,00g/m ²
Thickness:	210,00µm
B1-cert.:	nein
Cold lamination:	ja
Heat lamination:	ja
Opacity:	>92%
Color L:	95,6
Color a:	1,0
Color b:	-4
Specular gloss:	>19
CIE Weiße:	>105 (D65/10°)
DIN ISO 16245	Nein
